DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, 23-27, and 30-38, drawn to interpolation processing wherein a target pixel is interpolated by calculating local average and local curvature terms, which are used for directional similarity tests, classified in class 382, subclass 167.
 - II. Claims 17-22, 28, 29, and 39-42, drawn to supplemental interpolation processing wherein a target pixel is interpolated based on a median of calculated hue values, classified in class 382, subclass 262.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the inventions have separate utility insofar as Group I describes a first interpolation routine, and Group II describes a different and supplemental interpolation routine for interpolating missing pixel values. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).

Art Unit: 2623

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
